DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Montague.

Montague teaches a system for accepting customer orders. In particular, Montague teaches multiple kiosks operated by a personal computer (column 5; lines 17-20). Examiner notes that the kiosks represent a plurality of client side terminals. The personal computer represents the server, which is connected to the plurality of client side terminals (or kiosks).

Montague further teaches that when the customer has completed his order he inserts case money into a payment acceptor (column 5; lines 64-66). Examiner notes that this represents an automatic change-giving machine adapted to receive coins and paper currency and to give change.
